

About VisionMechanic.net

Description

Docs, teachers, therapists are all welcome!

Vision is central to human function and development, knowledge of and training in how to address visual functional concerns is therefore critical. Vision Mechanic is a growing library of notes, activities, and training elements for those working in rehabilitation and education. At Vision Mechanic, an array of resources can be found on vision, including continuing education opportunities.

Our team consists of an optometrist and vision rehabilitation occupational therapist who share information to make the vision-blind aware.
